-I- FUNCTION: Integrin alpha-M/beta-2 is implicated in various adhesive interactions of monocytes, macrophages and granulocytes as well as in mediating the uptake of complement-coated particles. It is identical with CR3 receptor for the iC3b fragment of the third complement component. It probably recognizes the R-G-D peptide in C3b. Integrin alpha-M/beta-2 is also a receptor for fibringen, factor X and ICAM1. It recognizes P1 and P2 peptides
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               the

DOMALN: The integrin I-domain (insert) is a VWFA domain with I-domains do not undergo protease cleavage.

SIMILARITY: Belongs to the integrin alpha chain family.

SIMILARITY: Contains 7 FG-GAP repeats.

SIMILARITY: Contains 1 VWFA domain.

SIMILARITY: Contains 1 VWFA domain.

SUBUNIT: Heterodimer of an alpha and a beta subunit. Alpha-M
SUBUNIT: Heterodimer of an alpha and a beta subunit. Alpha-M
associates with beta-2.
SUBCELLULAR LOCATION: Type I membrane protein.
TISSUE SPECIFICITY: Predominantly expressed in monocytes and

It media interaction during inflammatory responses. It is espe important in monocyte adhesion and chemotexis.

SUBUNIT: Heterodimer of an alpha and a beta subunit.
                                                                                                                                                                                                                                                                                                                                      L; M81695; AAA59180.1; —

SIMILARITY: Belongs to the integrin alpha chain famil
SIMILARITY: Contains 7 FG-GAP repeats.
SIMILARITY: Contains 1 VWFA domain.

```

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

The present sequence is that of cDNA encoding a human surface-bound CC anthrax toxin receptor (ATR). The cDNA is a PCR amplification product from HeLa cells and human placenta cDNA libraries. Anthrax toxin CC protective antigen (PA) binds to the ATR at a von Willebrand factor A CC domain located in the extracellular domain of ATR. The invention provides ATR polypeptides and polymucleotides, vectors, host cells, and transgenic CC and knock-out animals. The invention also provides methods for centrifying molecules that bind the ATR and which reduce the toxicity of CC involves administering an agent that inhibits binding between PA and ATR CC include ATR or a PA-binding fragment of ATR, a PA-binding polypeptide at CC least 80% identical to these, a fusion protein, a monoclonal or CC least 80% identical to these, a fusion protein, a monoclonal or CC polyplonal antibody, a polypaccharide, a lipid or a monocloca acid. ATR CC polyplonal antibody, a polypaccharide, a lipid or a mucleic acid. ATR CC polypoptides, and as molecular probes
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Query Match

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       밁
                                                                                                                                                                                                                              02-AUG-2000;
11-AUG-2000;
11-APR-2001;
The invention relates to an isolated molecule comprising an antibody variable region which specifically binds to an extracellular domain tumour endothelial marker (TEM) protein selected from ABB90732, ABB9 ABB90749, ABB90750 and ABB90769. The antibodies which bind to TEM proteins have cytostatic, immunostimulant and antiangiogenic activit
                                                                                                                                                                                                                                                                                                                                                                                            Human; mouse; rat; TEM; tumour endothelial marker; NEM; PEM; cytostatic normal endothelial marker; pan-endothelial marker; immunostimulant; antiangiogenic; tumour; neoangiogenesis; vascularised tumour; polycystic kidney disease; diabetes; retinopathy; rheumatoid arthritis;
                                                                                                  An isolated molecule comprising an antibody variable region which specifically binds to an extracellular domain of a tumor endothelial marker (TEM) protein, useful for inhibiting tumor growth.

                        The invention relates to an isolated molecule comprising an antibody variable region which specifically binds to an extracellular domain of a tumour endothelial marker (TEM) protein selected from ABB90732, ABB90740, ABB90749, ABB90750 and ABB90769. The antibodies which bind to TEM proteins have cytostatic, immunostimulant and antiangiogenic activity. They are useful for inhibiting tumour growth, neoangiogenesis in subjects bearing a vascularised tumour, polycystic kidney disease, diabetic retinopathy, rheumatoid arthritis and psoriasis. Human, mouse and rat TEM genes and the encoded proteins (ABL92075-ABL92141 and ABB90721-ABB90789) are disclosed, as are marker oligonucleotide sequences: tumour endothelial markers (TEM) ABL91996-ABL92041 and ABL92143-ABL92191; normal endothelial markers (NEM) ABL92042-ABL92074; and pan-endothelial markers
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Human; mouse; rat; TEM; tumour endothelial marker; NEM; PEM; cytostatic normal endothelial marker; pan-endothelial marker; immunostimulant; antiangiogenic; tumour; neoangiogenesis; vascularised tumour; polycystic kidney disease; diabetes; retinopathy; rheumatoid arthritis; psoriasis; gene; ss.
endothelial markers (TEM) endothelial markers (NEM) (PEM) ABL91903-ABL91995
                                                                                                                                                                                                                                                                                                                                                                                                                                                                   An isolated molecule comprising an antibody variable region which specifically binds to an extracellular domain of a tumor endothelmarker (TEM) protein, useful for inhibiting tumor growth.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 01-AUG-2001;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Human Tumour
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       ABL92104
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       VINU ( OFAD)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            1081

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    밁
The present sequence is that of cDNA encoding a human anthrax toxin creceptor (ATR). The cDNA, previously designated TEMB, was originally consolated by PCR from HeLa cell and human placenta cDNA libraries. It was cidentified in a database screening using a newly isolated human cDNA (see ABV73881) which encodes an ATR (see ABP54903) that is identical to the CR TEMB polypeptide except in the cytoplasmic tail, suggesting differential constraint of a primary mRNA transcript. TEMB was not previously identified constraint of a primary mRNA transcript. TEMB was not previously identified constraint of the ATR and which constraints and transgenic and knock-out animals. It also constraint of the ATR and which constraints in a human or animal involves administering an agent that constraints binding between anthrax toxin protective antigen (PA) and ATR at level effective to reduce the severity of anthrax. Suitable agents include the TEMB polypeptide or a PA-binding fragment of it, a PA-binding consolonal or polyclonal antibody, a polysaccharide, a lipid or a nucleic acid. ATR polynucleotides can also be used in the recombinant production
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       mat_peptide
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               08-JAN-2003
